

## **Research – College of Biological Sciences and Environmental (COCIBA)**

### **Relevant works**

Based on the USFQ Personnel and Ranking Regulations, in addition to the works of relevance established in this document, the College has identified other works of specific relevance, as determined in article 39.

**Art. 39. Other relevant works.** - Whenever necessary, the University may establish other relevant works as long as they have standardized valuation procedures, verifiable and documented.

Additional relevant works are:

- Indexed publication. – An indexed publication is a work of individual or collective authorship, that meets the following criteria:
  - Be published in a journal indexed in SCOPUS, Web of Science, PUBMED at time of publication, considering that for a scientific journal to be indexed in these databases, must meet strict minimum criteria from a formal, editorial and content point of view.
