

TOMÁS DE BERLANGA SCHOOL SUSTAINABLE EDUCATION

ABOUT THE PROJECT

The project's main objective is to establish the private school Tomás de Berlanga as a pilot intervention to develop a long-term educational model for sustainability in the Galápagos Islands, focusing on conservation, social development, and global citizenship.

› Location

Situated on the highlands of Santa Cruz Islands in Galapagos.

› Quick facts and impact

180 
students in Galápagos will become leaders in sustainability and conservation.

21 
K-12 teachers will transform education towards global sustainability in Galápagos.

Over **20%** **schoolchildren** encounter difficulties in continuing their secondary education due to a lack of resources and teachers in the Galapagos Islands

OUR GOAL

US\$ 1,000,000

- › Infrastructure
- › Professional Development
- › Healthy Eating on Campus
- › School Garden
- › Sustainable Educational Model
- › Equipment and Materials
- › School Energy Efficiency
